Phoenix
Volume 31
Embry-Riddle Aeronautical University
600 South Clyde Morris Boulevard
Daytona Beach, FL. 32114-3900
(904) 226-6048
Enrollment 4,586

Phoenix Archive - 1973

The campus as seen from above in 1973. The Gill Rob Wilson Flight Center (left), Academic Complex (lower right), and Doolittle Hall (upper middle) were the only buildings at that particular time. Parking extended to a much different flight line and existed where the Jack R. Hunt Library and Wright Flyer stand today.

Chief Pilot Paul McDuffee (right) poses next to a Crusader 2 along with John Paul Riddle. Paul McDuffee now serves as Vice-President of Aviation Training and Industry Relations.

Phoenix Archive - 1986

E.R.A.U. Past & Present

In 1925, J. Paul Riddle: military pilot, "barnstormer," a visionary believed that aviation needed to be learned in a safe and systematic way, so he teamed up with T. Higbee Embry, who loved aviation and had some initial capital to begin a grand adventure in the world of aviation education in 1926 in Cincinnati, Ohio.

J. Paul Riddle's dream of learning to fly safely was the premise of the school he cofounded, and was exemplified dramatically in World War II in South Florida. The Embry-Riddle School of Aviation, at the Carlstrom Field training area, maintained three years of non-fatal flight time, while training thousands of pilots for the war effort.

During the 50's E.R.A.U. President Isabel MacKay led the school into the world of civilian aeronautical training, to include airframe and powerplant training, two-year engineering degrees, and the flight department. In the early 60's President Jack Hunt

realized the necessity for more space, and E.R.A.U. not only grew and flourished under his leadership, but additionally was moved from Miami to our current location in Daytona Beach.

We have grown dramatically in Daytona since 1965 with a continued but constantly adjusted vision of the future. Academic programs which range from Airway Science to a Masters degree in Software Engineering helps to bring knowledge diversity in a technical field that continually changes. We are a complex whole - technology reaching to help students learn about working in the future of aviation/aerospace.

Embry-Riddle is not just a place but an institution built on the important vision of those before us. Embry-Riddle has survived and thrived by envisioning the future on wings of change and learning to adapt as we enter this new century.

- Jean Snyder

Phoenix Archive - 1973

The Cessna C-172 was the main training aircraft for E.R.A.U. in the 1970's and early 80's. With the recent Cessna partnership, the new C-172 will once again become the main training aircraft for E.R.A.U.

Max Aulet

Partnering with FlightSafety has benefited E.R.A.U with the introduction of the full motion Boeing 737 simulator. Students can not only learn the operation of large commercial aircraft but also get the chance to interact with professional pilots training on the same equipment.

Utilizing the new Pentium IBM machines acquired through Information Technology, Marc Janisch searches for information about E.R.A.U. The new machines are used by students in all majors to complete assignments and communicate ideas.

Max Aulet

New Alliances

We have new alliances with big names in the industry which will push us into the competitive twenty-first century. The alliances are mutually beneficial as these industrial giants service the Embry-Riddle family.

In 1995, E.R.A.U. entered into a partnership with FlightSafety International to develop and create an advanced flight simulation center. This center was completed in 1997 and houses two full motion simulators. The simulators are rated at the highest level (level D) and properly simulate a Boeing 737-300 and a Beech 1900D. This allows Aeronautical Science students to reduce their training time and prepare them for the industry.

IBM has joined forces with E.R.A.U. in an agreement which is aimed at helping to support the university's implementation of new and emerging technologies, including learning through web education. The university will purchase \$2.5 million in computer equipment from IBM to keep us on

the leading edge.

When the Cessna aircraft company went back into production with the C-172R, E.R.A.U. decided to form an agreement which will offer our students the chance to fly the modern C-172R as part of their training. The C-172R will eventually replace the university's current fleet of aircraft.

Our first direct hire bridge program has been established with Atlantic Coast Airlines. The agreement establishes criteria, specific requirements, minimum flight experience requirements and preferred hiring status for graduates. This will enable select Aeronautical Science students to get hired as a first officer in the Jetstream 41 immediately after graduation.

The University is leading the way into the future of aeronautics. By partnering with other companies, we shall soar towards the new millenium.

- Christian Sarna

Max Aulet
The newly acquired Cessna 172R will help replace E.R.A.U.'s aging fleet of Cessna 150s, Aerospatiale Tampicos, Mooney M20Js and Piper Cadets.

Max Aulet
Rob Papandrea and another residential advisor man the help desk which handles resident questions and problems.

Max Aulet
Located on the first floor, the cafeteria has added a convenience to students looking for a bite to eat without traveling far.

Max Aulet
Joseph Napoli, Richard Martin, and Josh Hetzel take some time out of their busy schedule to watch T.V. in the Student Village's recreational room.

The Student Village

The biggest part of Dr. Sliwa's building plan was the Student Village it went into the planning stages just over 2 years ago. With the addition of the Student Village's 1900 students, Mckay's 414 students, and Doolittle's 350 students; Dr. Sliwa's residential campus has come into being with increasing the percentage of students on campus from 19% to 40%.

The Student Village is a proud accomplishment for the housing department, just ask department head Sonja Taylor. The dream that is the Student Village came into reality when E.R.A.U. sold \$51 million dollars in Educational Facilities Revenue Bonds. The proceeds not only funded the construction of the Student Village but also allowed for an additional residence hall for

the Prescott campus.

The Village was created with many amenities that you can't get living off campus. Like the other dorms on campus, the Village has data links in the rooms for each student. The Village also has tutoring labs, campus classes and a Living Learning Program. Instead of a boring cafeteria like you would see on any other campus, the Village allows you to choose what you want to eat with the inclusion of some of the halls allowing you to cook for yourself. Other perks of dorm life are residential advisor activities, free cable, inexpensive laundry facilities, a game room and an exercise room. Best of all is a housing staff that is always there to lend a helping hand.

- Lee Homan

Max Aulet

The Student Village as seen from Richard Petty Drive. The Student Village has a number of rooms that allow students to leisurely watch aircraft landing on runway 07L.

Max Aulet

Doolittle Hall has had minor refurbishments that include a newly furnished front entrance and entrance locks that operate off a student's Eagle Card.

What once was a parking lot has now been changed into a landscape walkway for student recreation. A barbecue pit and volleyball sand court has been added for student enjoyment.

Max Aulet

Old Dorms Refurbished

When Dr. Sliwa arrived in 1991 one of the many goals he had was to make the campus more residential. At that time the campus housed less than 20% of the student body, Dr. Sliwa wanted to change that. He believed that everyone should get a well-rounded college experience and part of that was living on campus. That way you get to know the campus and your fellow students, Sliwa's goal was to take the 20% figure and triple it in during his time at Embry.

The first thing they started with was an all encompassing Building Plan. One part of that plan was to upgrade "The Rock". "The Rock", known as Doolittle Hall, is the oldest living permanent structure on campus. In the summer of 1996 upgrading of Doolittle's exterior began. This included adding on new brick and more insulation. Rather than shut down Doolittle altogether, the university waited until the summer of 1997 to complete Doolittle's face-lift. In 1997, they worked on the inside which included

an all new heat, air conditioning and plumbing facilities. They also installed a new elevator to meet ADA codes. But they didn't forget about the little things, housing added in data lines, painted walls and put down new carpet to welcome the approximately 350 incoming freshman that occupy Doolittle. McKay, the other underclassmen dorm, also got some work and a newly landscaped walk area where a parking lot used to reside.

In addition to refurbishing old dorms, the Embry-Riddle Resident Student Association (E.R.R.S.A.) was established in 1996 as a governing body for the enhancement of student living on campus. The E.R.R.S.A. is designed to represent student's views, give input to housing decisions, and provide social activities for those on campus.

By renewing old facilities, E.R.A.U. is making small changes that invests in the future of those who come after us.

- Lee Homan

Max Aulet

The back of Doolittle Hall has been refurbished as well as the walk to the Student Center. A drainage ditch has been removed to create a more pleasing view.

Chris Sarna

A flight student and instructor go through the procedures necessary to properly operate the Beech 1900D. The Beech 1900D can simulate numerous types of emergencies for the student to learn from.

This advanced flight simulator is used to teach and prepare pilots how to fly commuter aircraft like the Beech 1900D.

Max Aulet

Simulator Bay

What better way for our students to learn then through real world scenarios. To this end the university employed two former flight crew members of the Beech 1900. Alumni Rob Marshall formerly a first officer and former Captain Gary Diamond. With the thousands of hours of experience brought to the program, students are getting a big leap forward concerning their careers.

It was on November 11, 1997 that the FAA approved E.R.A.U.'s first B737-300 level "D" making possible advanced flight training for students as well as visiting airline professionals. Built out in Tulsa, Oklahoma, by FlightSafety International, the Boeing 737-300 and Beech 1900D simulator are housed in the Advanced Flight Simulation Center. The Simulation Center has become the focus for professional flight training inside as well as outside the university. By allowing training to outside professionals, ERAU has created a system whereby students can interact and "network" with

their professional peers.

The Simulation Center is also being utilized for internship as well as graduate research opportunities through the FlightSafety Training Systems Division located at the Center. The FlightSafety Training Systems Division is in charge of producing advanced simulation systems for use by commercial and military organizations throughout the entire world.

The partnership between E.R.A.U. and FlightSafety International has allowed for unique opportunities to develop for both parties. E.R.A.U. has gained the ability to access level "D" simulators for training as well as research into such areas as cockpit resource management. FlightSafety in return gains housing for its advanced simulators as well as prominent recognition in the aviation market. E.R.A.U. and FlightSafety International has brought about a change that will be felt for many years to come.

- Matthew Bielanski

Max Aulet

The Advanced Flight Simulation Center is always visible to flight students who are passing by on their way to the Flight Line.

Chris Sarna

Karen Magnussen

E.R.A.U. mechanic, Karen Magnussen, performs a visual inspection of the flywheel connected between the propeller and the engine. In-house mechanics allow for quick turn-around on aircraft repairs.

Two mechanics are adding new tire treads to Cessna 172R wheel hubs. The basic day-to-day operations keeps the Fleet Maintenance Center busy.

Repair Hanger

The Flight Department returned to its roots this year with the re-establishment of in-house aircraft maintenance. The E.R.A.U. Fleet Maintenance Center opened its hanger doors in June 1997.

Responsible for all line maintenance, progressive and 100-hour inspections, the Fleet Maintenance Center (FMC) employs 30 full-time airframe and powerplant (A&P) mechanics, many of whom also possess their Inspection Authorization (IA). In addition to the hanger floor, the Fleet Maintenance Center includes a inventory room that houses parts totalling up to \$500,000.

One of the most valuable resources the Fleet Maintenance Center utilizes are its student employees. Jack Haun, the General Manager of the FMC, instituted an apprentice program for E.R.A.U. students who already earned their A&P licenses from the school and who are pursuing a degree. These students work along side of the FMC's mechanics and gain practical knowledge of light aircraft maintenance, a valuable asset upon their graduation.

The FMC's goals of reducing maintainan-

ce costs and increasing the availability of aircraft was met right after the facility opened. The FMC has implemented recycling, warranty, and economical component overhaul programs to help keep costs low.

One of the biggest concerns in aviation today is safety. The Fleet Maintenance Center makes extra efforts to make sure the fleet, as well as its employees, are in compliance with FAA, EPA, and OSHA regulations. Each employee receives several training classes each semester on topics from Seminole maintenance to chemical safety.

To keep up with the expansion of the E.R.A.U. fleet by the addition of new Cessna 172Rs, the FMC plans on adding a third shift to its schedule. This will ensure the availability of aircraft for E.R.A.U. flight students as well as keeping up the high quality level in the Fleet Maintenance Center's product.

- Karen Magnussen

Max Aulet

The Fleet Maintenance Hanger is home of E.R.A.U.'s repair and overhaul center. Mechanics perform a variety of maintenance tasks to keep the fleet operational.

Max Aulet

John Safer's statue, "Beyond", is a symbol of far reaching goals and accomplishments that embody future success at E.R.A.U.

"Reaching High" is a stainless steel structure representing the spirit of E.R.A.U. and the students who attend. Donated by Mrs. Lehman, the statue reaches towards the medium that many at E.R.A.U. achieve to master.

Max Aulet

Future of ERAU

What will we see in the future as we enter the new millenium? Let's imagine the possibilities! Some are reality now, others are possibilities for future realities...

Everyone at E.R.A.U. will get an Eagle Card and a no-cash policy may be the way students handle business and fun on campus. Everyone on campus will be linked electronically. A student or a prospective student can step up to one of the many kiosks on campus and electronically find out what's going on around campus or what degree options they have. You can register on you computer for the next semester. No lines.

Financial aid professionals can talk to you in virtual space; on-line; about your immediate problems - 24-hours a day! The University, has received a major influx of benefactor cash so many scholarship and grant options are available.

with a fixed number of 4800 students on campus, and the SAT scores reflecting a highly charged academically oriented stu-

dent body; research, group projects and programs are conducted on campus for industry partners, providing cash and credit to students involved in this hands-on work, assisted by faculty support.

Throughout the year, E.R.A.U. will be a dynamic, energized environment. With hundreds of different programs being conducted throughout the year - housing will never be empty, and with the new money, "specialty housing" will be developed in pockets of land adjacent and near the campus for married couples, organizations, and educational groupings.

We are now in the N.C.A.A. in all sports and perhaps our Women's Basketball will win a regional conference title. We could have 400 student organizations and a new Student Center with night-time "CoffeeClub".

When? Perhaps in the near future, or distant future! Time moves quickly on the wings of change.

- Jean Snyder

Max Aulet

The Lehman Building is home to a number of technology majors designed to support aviation. These majors not only support aviation but also push it towards an improved future.

Seniors

Max Aulet

The status of senior is the milestone that we strive for in our college careers. It is the final mile that we must walk before we can receive the diploma that grants us entry into the working world. The strength to walk that mile may come from family, friends, colleagues, or from within. No matter what the differences are, the fact that we are seniors binds us together. We have risen above the rest because we have faced the challenges that have come before us. The times we have spent together will not be forgotten as we approach a new journey. It is this final mile where we will put on a new pair of wings for the greatest change of all, the real world.

Undergraduates

Being the lifeblood of the campus, the undergraduates are the force that move through the campus giving it life. The undergraduates come from all walks of life whether it be across the ocean or next door. It is Embry-Riddle that brings us together to strive and succeed. Working together we can bring about innovation and change to create a better world. Stumbling through the darkness of our college career, we move along toward the far away light of graduation. It is our comradery that helps us to keep our focus and dedication toward that light. Only together do we become a driving pulse of change at E.R.A.U.

The Embry-Riddle mascot kicks back and relaxes as the Eagles basketball team moves to wrap up another victory.

Karen Magnussen

As the university grows so does the program. More scholarships and teams are being formed every year. Women's soccer is one of the newest additions to the athletic department. The Eagles tennis team earned its first ever FSC tournament championship in doubles. Golf presence as team sport continues to gain experience recruiting new ERAU students. Next year our athletic teams will continue to grow.

School spirit is proudly displayed by Roman Miazga, John Blackman, Dave Thomas, Deserie Rios, Jens Hennig, Nadean Carson at the homecoming basketball game.

— Christian Sarna

Sports

Max Aulet

Max Aulet

Pete Stubbs, drives it home up the middle through an aggressive group of defenders. The Sun Conference is a televised proving ground for the league.

"Defense" is the only audible word in the building as the crowd cheers on junior guard Matt Barley, as he gets into position against Warner South.

Max Aulet

Basketball

Coach Steve Ridder's Eagles finished the 1997-98 regular season with an overall record of 20-11. Because of a three-way tie in the Florida Sun Conference the fieldhouse was packed during the Sunshine Networks television broadcast. This gave our Eagles the edge and they came out victorious, which allowed the Eagles Basketball team a return trip to Idaho for it's third year consecutive national tournament. 32 teams competed at the NAIA level in Nampa, Idaho. This year was the first time the team did not make it out of the first round.

With the departure of Seniors such as Anthony Burroughs, the squads most valuable performer and Jason Trippet most dedicated player, new blood will be needed. Recruitment will be a priority. With the departure of Assistant Coach Joe Cambron the team has a lot of restructuring to do.

The Team is expanding their experience by participating at an international competition. The summer tour will take place over eight days across Europe. Some of the stops include the Netherlands, Belgium, Luxembourg and Paris. We look forward to seeing the results with these wings of change.

Max Aulet

As President Sliwa observes this intense game in the jam packed stands, junior guard, Austin Brownlee eyes an open man in the final seconds of the game.

John Phillips

Sophomore outfielder, Brian Carter prepares for Webber's best pitcher. Brian went on to play the All-Florida Sun Conference with 4 other teammates.

Luke Martin a sophomore left handed pitcher gets some last minute strategic advise from Assistant Coach Todd Guilliams between innings.

John Phillips

Baseball

Eagles Baseball finished the 1998 season ranked 9th. The eagles led the nation in earned run average for the second consecutive season giving up an average of 2.37 earned runs per nine innings. Another impressive event involved an Eagle being drafted. Doug Bridges a senior left hand pitch was selected by the Anaheim Angels in the 17th round of Major League Baseballs spring draft and was assigned to the Boise Hawks short season "A" team. In the eighties people would have laughed at the idea of an ERAU student being drafted into the majors. Nowadays this improved campus allows for a real experience, similar to other non-technical University's.

Throughout the season the Eagles made their mark. Coach Greg Guilliams and his brother Assistant Coach Todd Guilliams have worked hard over the years to put together a dynasty, which is taken quite seriously in the NCAA Sunshine State. "Not bad for a bunch of astronauts!" Closing any season with a 41-11 record including a 24 game winning streak is something is something to be proud of, the fans won't forget.

John Phillips

Head Baseball Coach Greg Guilliams has a great deal to be proud of this year including his program's very impressive 41-11 record.

Karen Magnussen

Senior setter, Chana Mamizuka starts the volley as Defensive specialist Jenny Gieger gets into place and prepares to do her job and help the team serve first.

Teamwork means bump, set and spike as Michelle Hatton, a senior playing the position of right side hitter, gets some altitude and goes for the kill.

Max Aulet

Volleyball

This was Trina Keeton's first year as head coach of the Eagles Women's Volleyball Team. From a real come from behind start and a real slow season in 1996, Coach Keeton wasn't able to recruit from outside the university but knew she had a "great bunch of girls." When asked how she reinvented the team, she said "by pulling the love out of their game. I needed to see who really still loved the game." Coach Keeton said that if she had to name players who really had a love of the game; Lasha Moton, Nicole Cauboe and Senia McIntyre are stand-out players. Out of five walk-ons who tried out, Sherry Fost and Laura Gliga have been "huge factors on the team." "The hardest fought win this season came during the semi-final against Nova Southeastern, in a two and three quarter hour match that could have fallen either way — that was a toughy." With a 33-6 winning season, placing Second in the Sun Conference and Third in the Southeast Region, Coach Keeton says, "We're stepping up a level. Not one time did I see us as "just N.A.I.A.". In competition we can hang with the best of the best. I hope and pray we can work hard to get the national competition finals and get a team GPA of 3.5 during the 1998 season.

— Matthew Bielanski

Each member of the team gets a tremendous boost from each other, they have a symbiotic relationship the eagles know they can depend on one another.

Max Aulet

Max Aul

Brian Stec, sophomore defender, sizes up the opponents and prepares for full field sprint. Soccer players must be in extreme aerobic shape.

Dan McNally a sophomore midfielder intercepts the ball and with some fancy footwork he helps the Eagles go from defence to offense.

Max Aulet

Men's Soccer

David Gregson, Coach for the Eagles Soccer Team believes 1997 was a major growth year for the team. After a 1996 season finish of 6-11, the 1997 winning season of 10-7-1 leads Gregson to hope for a tournament win in 1998.

This year the Eagles were able to attract better student athletes. According to Gregson, Connally Edopzien from Nigeria and their all time leading scorer for 1997, Stefan Oresten, from Sweden (with one season left), "both want to be commercial pilots and good soccer players. It's a good fit for us."

Their most hotly contested win this season, according to the Coach, was played with Covenant College. With many team injuries, the coach put in his goalie, John Haworth to play. Haworth made three goals including the game winner in sudden death overtime. It was, "a fairy tale story."

"The goal this year is to win the tournament because this group of players has never been into the final four. We finally have enough quality players driven to success and realize we are on the verge of something special."

Max Aulet

Scoreboard

Clearwater Christian	6-1 W
Florida Southern	1-5 L
Rollins	4-1 W
Savannah College of A&D	5-0 W
North Florida	1-0 W
Webber	3-1 W
Northwood	2-1 W
Piedmont	4-1 W
Flagler	0-2 L
Palm Beach Atlantic	1-0 W
Webber	1-1 T
Flagler	0-2 L
Life College	0-4 L
Auburn-Montgomery	1-3 L
Covenant	4-3 W
Nova Southeastern	1-4 L
St. Thomas	1-3 L
Eckerd	1-0 W

A midfielder, senior Jose Garcia takes it out from the corner. The addition of stadium style lights allows the eagles a night schedule.

Max Aulet

Dana Wright senior defender and Chimesa Harrison senior forward, regain control of the ball. Teamwork is what this game is all about.

A freshman midfielder, Roberta Petit, keeps control of the ball with senior forward Roberta "Bo" Porco remaining open for a pass.

Max Aulet

Women's Soccer

Women's soccer finished it's last season as a club this year. For years the women's soccer club have been working hard, proving itself as a worthwhile endeavor for the university.

Over the years the club competed against the varsity teams of Flagler, Rollins, Palm Beach and so on. With very little assistance from the University and some funding from the Student Government Association, the soccer club worked hard. Last year the Men's Soccer Assistant Coach, Joe DePalo offered the ladies guidance in their athletic endeavors. They were able to organize 9 games, which got soccer ball rolling in the right direction.

Next years 1998 season will be the first year ERAU will see the women's eagles soccer team. Dan Blank has been selected as the Head Coach. He has previous experience at Brewton-Parker College and Wheeling Jesuit University. He has numerous ideas for the development of the team. Heavy recruitment has taken place and Coach Blank's long range goals include a realistic time table up to the year 2000. At which time he feels that he can have the experience to compete in the national tournament.

EMBRY-RIDDLE
WOMEN'S SOCCER

Devyn Evertt a junior sweeper quickly puts the ball into play, one of the few chances for a player to show upper body strength.

Max Aulet

Max Aulet

Flexibility is a prerequisite for joining the Eagles Cheerleading Squad. Mia Phelps, Melissa Cabrera and Alison Sandberg get vertical.

Felisha Mason and Paul Rosell cheer the crowd on as our favorite mascot creates mayhem throughout the game on and off the court.

Max Aulet

Cheerleaders

Max Aulet

Erica Arroyo and Joao Carvalho-Silva are energetic in their approach to get the crowd pumped up in the final seconds.

Max Aulet

Audience participation is a major part of the ERAU experience. Alison Sandberg employs the assistance of one of our younger fans.

Closing

With Dr. Thomas Hilburn and Dr. Leon Flancher leading the 1997 December graduating class, we're filled with a sense of accomplishment from the changes that we have lived through. ERAU's changes have brought about an expansion that will be hard to match. With six new facilities built within a 4 year span and a new president facing the challenges of the next millenium. ERAU will reap the benefits and problems of a changing community. It will be the job of future students and leaders to re-establish our community, lifting ERAU into the 21st century on a new pair of wings.

— Matthew Bielanski

PHOENIX YEARBOOK

Printing: Taylor Publishing Company, based in Dallas, printed the 31st Volume of Embry-Riddle Aeronautical University's Phoenix Yearbook. This year's book, whose theme is "Wings of Change", was a fall delivery book. The book was printed on 80 weight paper. Questions and comments may be directed to the Phoenix office at (904) 226-6048, located on the second floor of the J. Paul Riddle Student Center at 600 S. Clyde Morris Blvd., Daytona Beach, FL. 32114-3900.

Cover: The cover was created by Matthew Bielanski. The design reflects the 1994 yearbook "Beyond Tomorrow" with quarter binding and ERAU block text in the center.

Typography: All fonts used throughout the book were supplied by Taylor Publishing Co. The fonts used throughout the book are: Times Roman, Eric, Geneva, Avante Garde, Univers Med Extra Cond.

Graphics: Graphics were created on IBM compatible computers with Adobe Photoshop, CorelDraw 6.0. Some clip art was taken from Taylor Publishing's clip art book.

Expenses: The book was contracted out to Taylor Publishing for \$32,300 and sold to approximately 250 students. The book was sold \$15 locally and \$40 internationally. National advertising was handled by Scholastic Advertising and senior ads in house.

Acknowledgments: I, Matthew Bielanski, would like to thank all those who have come up to the office to help us in this endeavor. My thanks would not be complete if I did not make a special mention to Jean Snyder and Max Aulet for their rock solid support in producing this book. I hope things go more smoothly next year and that we get the necessary support from the ERAU community that we need so badly.

GARMCo IS AVIATION INSURANCE

1 800 777 1452

1 404 292 5008

(Tom Meers - 1980, Pres.: General Aviation Risk Mgmt. Co.)

Helping pilots is our proud legacy, and our continuing commitment.

It was critically important back in the 1930s when Captain "Jepp" Jeppesen charted perilous routes to help his fellow pilots safely navigate the skies. Just as important in the 1950s was Paul Sanderson's training system, developed to help ensure that the large number of new aviators would be knowledgeable, safe pilots. That same dedication remains part of the Jeppesen legacy today.

Just as in years past, the Jeppesen name instantly communicates quality and confidence to pilots and the world. Helping pilots is our proud legacy. Because we believe in the future of aviation, we have established the Paul E. Sanderson scholarship fund for students at Embry-Riddle, continuing our commitment to excellence.

Performance, the universal measure; it's the difference between success and failure, satisfaction and shame. Whether for business or pleasure, exceeding your performance needs has always been our goal. McCauley products, people and service have set the propeller performance standard in General Aviation for over 60 years with:

- Design Innovations, single-piece, lightweight oil-filled hubs
- QZP Propellers, quiet and fast - scimitar shaped blade designs
- BLACKMAC STC Propellers, performance upgrade conversion kits
- AD Free family of high performance turbine propellers
- Extraordinary reliability, two-year standard warranty
- Global distribution and support, 24 hours a day from experts
- ISO Certified production facilities, highest quality standards

High performance for commercial, corporate and personal aircraft.
It's your measure. It's our mission. It's high value.

GROUPE AEROSPATIALE

JOIN EAA.

EAA is the **only organization** that opens its doors to all who wish to learn more about the FUN, EXCITEMENT and FREEDOM that flying offers. No matter what part of aviation you love - EAA is an organization for you. EAA hosts the **world's largest fly-in conventions** - EAA OSHKOSH and EAA SUN 'N FUN - where aviation enthusiasts the world over celebrate the freedom and excitement of flight.

THE CHOICE IS YOURS

EAA is the **only organization** that gives you a choice of six magazines - each geared to individual special interests.

Sport Aviation[®] magazine

For the latest news, views and articles covering all aspects of building, designing, flying, restoring or maintaining sport aircraft. Published 12 times a year. Each issue contains more than 140 pages of fascinating editorial about the world of aviation. *Sport Aviation* also features some of the best in aviation photography. Find out what's happening - join EAA and read *Sport Aviation* magazine.

WARBIRDS[®]

A Division publication of the EAA Warbirds of America. See and read about the vital role these aircraft played in World War II.

VINTAGE[®] AIRPLANE

A publication of the EAA Antique/Classic Division with articles on the legendary aircraft of the 20s, 30s, 40s, and 50s.

SportAerobatics[®]

From the International Aerobatic Club, another EAA Division, this publication features articles on competition, technical information, how to fly maneuvers, flight and ground safety, new equipment and much more.

EXPERIMENTER

EAA's "how-to" publication where one can learn the secrets from experienced craftsmen on construction techniques, maintenance, performance, efficiency and safe flying practices.

EAA puts the FUN in Flying for Everyone!

JOIN EAA TODAY!

Ties that Bind

As part of our continuing support of aviation education, USAIG is proud to sponsor three \$1000 annual scholarships for full time students enrolled in Professional Development Programs (PDP) offered at Embry-Riddle and other University Aviation Association (UAA) colleges. Together, USAIG, Embry-Riddle and the UAA can be an essential part of empowering today's aviation managers. For more information on scholarship requirements, contact the National Business Aviation Association (NBAA) at (202) 783-9000.

MOST KEYS UNLOCK DOORS.

ONE UNLOCKS YOUR DREAMS.

The new Cessna Skyhawk 172R. To the students and graduates of Embry-Riddle Aeronautical University, it holds the key to a great career. As the industry's leading institution of aviation and aerospace education, Embry-Riddle takes pride in offering its students the very best in training aircraft. That's why they recently signed the largest university fleet order in history — a contract that will keep the newest, most advanced Cessna Single Engine aircraft on Embry-Riddle's flight line. Together, we're working to unlock the dream of flight for a whole new generation of pilots.

To learn how, call us at 1-800-4-CESSNA or 316-941-6056.

Cessna
A Textron Company

With you for 70 years. Making history. Building futures.

How we moved Bill Hollister's career into the CONTINENTAL EXPRESS LANE.

If you're like Bill Hollister, getting started in an airline career is more than a matter of what you know. It's also *who* you know. And, more precisely, who we know as a major pilot development resource for some 20 regional carriers.

More than 4,000 pilots – including Bill – are now flying right- and left-seat airline positions after getting a head start through our Regional Airline New Hire Program. The steps

are simple: a one-day evaluation identifies qualified pilots who are then matched with airlines who are ready to interview and who rely on this screening process to find attractive

Houston-based Continental Express has relied on New Hire candidates since 1984, hiring as many as 400 first officers and captains per year through the program.

candidates. With a conditional offer of employment in hand – Bill's was from Continental Express – the candidate begins four to six weeks of type-specific, self-financed training at a FlightSafety Learning Center selected by the employing airline. Training is

conducted on employer-specified equipment, and the program includes indoctrination in that airline's particular culture and operating procedures.

For Bill, the New Hire Program offered a proactive, prudent strategy for moving into the airline environment.

"I guess you could say that I used FlightSafety to take charge of my career," says Bill. "The New Hire Program gets you into the professional field fast, and keeps you from wasting time on the sidelines."

Like Bill, you could use our connections to get hired, and then use our instructors and advanced simulators to become fully prepared for a specific job – *your* job. With the New Hire Program, there's no wasted training, and – equally important – no wasted time. So give us a call now. We'll help you move into high gear.

FlightSafety's fleet of advanced flight simulators allows type-specific training – tailored to the needs of the employing airline.

BILL HOLLISTER
FIRST OFFICER, CONTINENTAL EXPRESS

Before he used our connections to land a position at Continental Express, Bill Hollister was working as a flight instructor in Daytona Beach, Florida. When he entered the New Hire Program, where he earned his EMB-120 type rating, Bill was a certified single and multiengine flight instructor, with an instrument rating and multiengine ATP certification.

FlightSafety international

FLYING

For over 70 years

Over the past 70 years a lot has changed in aviation, but one thing has remained constant - the role of FLYING Magazine. From the first barnstormers to the first men to walk on the moon, FLYING has been an eyewitness as well as an engine of growth.

As we look to you - the future of our industry - it's impossible to predict what will be, but we can at least chart a course. Our goal was clearly stated in the very first issue of our magazine: "If it will help speed the great day that is coming... ushering in a new era, we will feel that we have also contributed something to the accomplishment."

We have no doubt that our original goal remains a worthy course and are proud to continue to work side-by-side with you to advance our mutual cause. The success story that is aviation has been mirrored in the pages of FLYING for more than 70 years. Now your indelible mark will be made in this enduring chronicle.

Congratulations from all of us at FLYING.

In 12 Seconds, We Launched Aviation History...

With the Wright Brothers and aviation pioneer Glenn Curtiss as company founders, the name "Curtiss-Wright" symbolizes innovation and progress. **Curtiss-Wright Flight Systems, Inc.** is a world leader in the design, production and overhaul of mechanical flight control components. Curtiss-Wright Flight Systems products are at work in every Boeing commercial airplane in production, including the new 777.

Curtiss-Wright Accessory Services, a new division of Curtiss-Wright Flight Systems, now provides high quality repair and overhaul services on all Curtiss-Wright Flight Systems manufactured products and on a wide range of other aircraft components including: pumps, valves, hydraulics, pneumatics, CSD/IDGs, electronics and electric motors.

Stay hungry.

Education is a lifelong process. We keep learning, and
that's how our appetite for knowledge grows.
Continuing education is a lifelong process.

Where shopping is a pleasure.

We'll train you until you pass—for one low price.

GUARANTEED!

If at first you don't succeed
in getting the licenses or
ratings we train you for,
try, try again...on us!

With this revolutionary new program,
we'll continue to train you at no extra
cost until you pass the required tests.
(Adequate physical and language abilities required)

- **Ab-initio Training Program** Earn your: private license • commercial license • instrument & multi-engine rating
- **Advanced Ab-initio Training Program** Includes: 200+hrs (70 hrs multi-engine), 60 hrs in our *Boeing 727 full-flight simulator*. We'll train you until you earn: • private license • commercial license • instrument rating • multi-engine rating • certified flight instructor rating (guaranteed interview for instructor position) • and your *flight engineers license*!
- **Flight Engineer/Bridge Program** If your sights are set on getting a job with a major airline, this program is a must! Includes 60 hours in our *Boeing 727 full-flight simulator*—20 hours each in the captain's, first officer's and flight engineer's seats, learning to work as a crew. We'll train you until you earn: • your flight engineer's license. Intensive training designed for pilots who want to bridge the gap between *piston-aircraft* and *turbo-jet* airline training environments. This will help you pass your interview and simulator screening to get the job!

- **Multi-Engine Time-Building Program** Includes: • 100 hours in a Piper multi-engine aircraft • 5 hours in a multi-engine flight training device • ground school. Here's a fast way to build flying time to qualify for an airline job. Plus, with typical multi-engine training costs, this program will save you money!
